EXPERIENCE

Intern Full stack Developer

Djubo.com | June-Oct 2020

- Carried out minor bug fixes related to logic, database and api integration.
- Implemented history tracking on several pages to keep log of changes to data.
- Work closely with front-end developers to integrate user-facing elements with server-side logic.

PROJECTS

Restaurant App

react-meals-sigma.vercel.app

- Created a basic restaurant app with list of items available.
- Used dummy data to render the list of items.
- Implemented cart functionality where user can add/remove the item to/from the cart.
- Used contextApi to manage data across the components

E-commerce App

https://github.com/sidaswal7/ecom-fullstack

- Created a full stack single page application using express js and react.
- Created api routes to handle requests from client and used mongoDB to store and fetch data.
- Used contextApi to manage data across the components
- Allow users to create new account or sign in with existing account so that they can perform CRUD operations on products.

Expense Tracker App

https://github.com/sidaswal7/ExpenseLog

- Created an expense tracker app with user authentication.
- Used redux toolkit for app wide state management
- User can create account and manage the expenses with CRUD operations.
- Implemented signup/login form for users using firebase authentication
